

Systematic Registration of past Activities

For the record, I have listed down many of the activities I have carried out in Norway. All that is listed down here is from the time I discovered that working inside the Mass Organization does not yield results as much of the time is spent in internal contradictions. The starting period for these activities is thus november 1977 when I moved to Stavanger. But there are a few activities during my one year stay in Oslo as chairman of the newly created Hafash Wudibat (Mass Organization).

For more details to the list of abstracts below read under My projects, My articles, My publications & My correspondenc.

Page 1

No.	Activity description	Category Subject	Status
1	After a discussion with Dr. Nerayo, a comprehensive study on the option of establishing teletransmission link between the field and the outside world was completed and delivered. This led to the realization of achieving the direct telelink with the field.	Project Telecom	C
2	Procurement and shipment of two Saturn-T satellite communication equipments including 2 telefaxes 2 telexes and many accessories. Some modified to fit the field condition. To see the entire report, purchase order and its shipment go to My projects.	Project Telecom	CC
3	A complete study of how to establish air link to the liberated areas for direct, quick and reliable trafic of cargo was made and suggestion made to the leadership in the field. The responce was positive and a project named DENDEN was established. Read My Projects.	Study General	AB/CC
4	A suitable Hercules cargo aircraft to be used for the direct link to the field was located in the U.S.A and contact established with the owner and seller. I found necessary help from two aviation consultants who are colleagues at work. For more read under my projects	Project General	AB/CC
5	A draft inquiry report on the possibilities of building a secret deep sea harbour in the northern shores of the field with the idea of establishing quick and direct sea link with the outside world was made. For more information read under my projects.	Project General	NC/CC
	A comprehensive study of how biogas operates in India and China was made by	Project	

6	collecting documents from plants in India and England. It was followed by preparing a project document for applying fund. While fully supported by RICE and the Economy office in Rome, Yemane Haile of ERA in Oslo unsuccessfully tried to sabotage it all.	Energy	AP *
7	After establishing contact with relevant institutions a supply of Leucania Lecocephalia seeds was received from Hawaii and sent further to the field. The soil adapted the new seed and grew well in Sahel. The tree grows 4 meters a year and resists draught.	Doc/Supply Agriculture	AP
8	After establishing contact with relevant institutions a supply of Albizia Falcataria seeds was received from Papua New Guinea and sent further to the field. The tree belongs to monoculture and grows about 8 meters a year. For more read My projects.	Doc/Supply Agriculture	AP
9	After collecting data about QUINOA plant I contacted the relevant person in Bolivia repeatedly to supply me with seeds but failed to respond. Quinoa is rich in protein content and survives in draught conditions. For more read under My projects.	Document Agriculture	NA
10	Purchase and shipment of Kenwood HF transceiver with extra long antenna to the field enabling radio telephone communication with the outside world via maritime channels. It was the beginning of the telecommunication venture. Read My projects.	Project Telecom	CC
11	Obtaining license from the Norwegian Telecom authorities to use the satellite terminals under Norwegian registration. Dr. F. Bakke played a decisive role in obtaining the license. The company EB was cooperative in the achievement of link with INMARSAT in London.	Project Telecom	C
12	Procurement and shipment of a complete set of diving equipments for 10 divers. The purchase includes 2 inflatable boats and two scooters. The scooters were brought from Russia. The scooters are the motorcycles of the underwater world.	Equipment Military	C
13	the scooters which were in our list of order for the divers training equipments were not in stock at the vendors store. They had to make a quick order from Russia. The Russians were not aware the equipments will be used against their ally, the Derg.	Military marine	C
14	Finding and sending a professional diving trainer to the field. The first attempt failed because of the coup-de-etat in the Sudan the day he arrived at the airport in Khartoum. The second trial was very successful in all its sides. For more read under my projects.	Project Military	AB
15	Finding and sending a politically suitable professional diving trainer to the field. He is both under water explosives expert and a diving instructor. He was politically conscious and his party supports the Eritrean cause. This was like a Mana. He made two trips.	Project Military	C
16	A second mission of the same trainer to the field one year later to train new diver fighters. He took with him new equipments and manuals. He became popular with his students and hosts. He also oriented them the use of the new captured diving equipments in Massawa. Christopher Brodersen was instrumental in obtaining the fantastically suitable instructor.	Project Military	CC
17	Supply to ERA of three portable, manually operating hand-mills from Tanzania. The product was designed by a Norwegian engineer aiming at helping poor peasant families in remote countryside. For more info. Read: my project hand-mill.	Purchase General	C *
18	Collection of valuable documents on BIOSALINE and the techniques used by Kuwait Israel and others of removing salt from the sea water for agricultural use. Some of the methods require big capital and technical resources but others do not.	Document General	C
19	Collection of documents and pictures from UNESCO and some libraries in Holland and Denmark on projects of water desalination in developing countries. This was done at the height of the global campaign against famine and drought.	Document General	C
20	An extensive collection of documents for Water Well Drilling Program project in Eritrea during the drought time. It includes geological and environmental data of Eritrea back to the Italian colonial time. It includes easy ways of drilling shallow wells.	Project General	C
21	An extensive collection of documents for Water Well Drilling project in liberated parts of Eritrea by contacting various vendors in Europe and USA for technical data and price tag of various light and mobile drilling rigs.	Project General	C
22	The study outlines the possibilities of small scale mining of iron-ore in the liberated areas of Eritrea. The study was presented to the Economy department in the field. Once iron-ore deposits are located, simple means of processing it can be realized.	Study General	NA
23	After making a comprehensive study on how to establish a postal service linking the field with the outside world, a preliminary report of options was presented to the leadership for evaluation and decision. The study includes sketches of routes to and from the field.	Study General	NA
24	18 minutes radio interview following my campaign against sending relief aid to uncontrolled and on conditions laid down by the Derg. I believe the campaign had strong impact on the donors in Norway to resist the Dergs conditions.	Interview media	C
	Media war between me and the Norwegian Consulate General and / NCA chief in	Writing	

25	Ethiopia which terminated in his dismissal from his job. He was defending the Derg and blaming the fronts for hindering the relief work. For more read under Media war.	media	C
26	Procurement and shipment of 300 aluminium handbags for midwives in the field. the consignment was shipped by air to Khartum. A pensionist father of my friend helped in receiving, controlling and dispatching the cargo at the airport in Oslo.	Material Health	C
27	Media campaign using local newspapers and radio interview against the planned dumping of Italian radioactive waste off the coast of Eritrea. I got a very good help from my enviro. conscious friend Martin Hovland whose article was published in the New Scientist.	Campaign media	C
28	Establishing of a company in Norway to help facilitate the license for satellite use, and make procurements, shipments and cover insurances in official and appropriate channels. MTB as a Norwegian company provided all the legality of the operations.	Management General	C
29	All the contact with INMARSAT in London, the installation and operation of the terminals, the procurement and shipment of goods and spare parts was done from Stavanger in close cooperation with Dr. Nerayo, Dr. Bakke and for payments ERA UK.	Management General	C
30	A study on the use of TELETEX and GAMMAFAX for use in the existing telephone line with the field was undertaken by making an enquiry with the vendors of the equipments and the manufacturers of the satellite terminals stationed in the field.	Project Telecom	C
31	Placement of Order for 3 Complete set of Saturn C compact terminals was done as a back up to the existing Saturn T. terminals. Shipment was done by Fred Olsen air cargo. This new version is much lighter in weight and smaller in size than Saturn T.	Project Telecom	C
32	procurement and shipment of durable Fascimile machine PF-1 RICHO + battery, Power supply / charger to PF-1 RICHO battery, TBK Compact phone and dozens of telefax paper rolls. The decision was made considering sustainability in rough environment.	material telecom	C
33	A complete study of data transmission from a PC in the field to other PCs elsewhere using modem link to the INMARSAT lines was made. The transmission cost was also provided. This was the quickest and cheapest way of transmitting big data.	Project Communic	NA
34	A complete study of the satellite communication charges at different times and to different continents, as requested by the Secretary General, was made and delivered. the study contains different sketches and diagrams.	Project Communic	C
35	A comprehensive study of the possibilities for the enemy (the Derg and the Soviets) to monitor the satellite communication messages with the field was made. The conclusion is that the Russians could do it but the Ethiopians on their own could not.	Investigation Communic	C
36	During the years Nov. 1987 up to Apr. 1990 a great deal of the communication by telephone and fax between the field and its offices abroad was made from my work place relieving the EPLF from operation cost. The satellite tariff then was very expensive.	Operation Telecom	C
37	Arranged the training of Zerai Abraham of Germany at the EB plant in Oslo for the INMARSAT terminals prior to his planned trip to the field. It was an important project because the engineers in the field were solely relying on the technical manuals.	Project Telecom	C
38	Report of inquiry about old Norwegian Naval Speed Boats that were for sale was made. I acquired sufficient information about the condition of the boats, who is eligible to bid, and conditions for sale by contacting knowledgeable individuals. See under My projects	Inquiry Military	C
39	A successful detective work to find out data about the five speed boats bought by the Derg from a Swedish yard and loaded on an Ethiopian ship named NETSANET. The detective work obtained the type of boats and the itinerary route of the ship.	Investigation Military	C
40	An inquiry on obtaining satellite pictures of KEREN and its vicinity at the time the EPLF fighters were surrounding the town was done. What kind of image resolution we get and how much it would cost was obtained. For more read under my projects.	Inquiry Military	CC
41	Shopping of many books with detailed specifications and illustrations on military equipments and explosives that include fitting silencers and making bobbytraps were purchased and shipped to the field in close cooperation with Bandera and Bruno.	Document Military	C
42	A second shipment of technical document with detailed specifications on how to make various types of weapons, home made explosives, and different combinations and specifications to modify a weapon for a different use. Paladin Press is the source.	Document Military	CC
43	A comprehensive collection of journals containing technical data of most of the Soviet made aircrafts from JAMES magazine and sending it to the field. The information contained on what the aircrafts can do and what they can not do.	Document Military	C
44	An extensive contact with an anti-aircraft weapons dealer led to the main dealers. the deal was almost concluded to buy SAM7 /K14 missiles and launchers at destination near Eritrea but a serious problem and mistrust emerged during the facilitation of the LC.	Contact Military	CC

45	Soviet researched super boots. Attempt made to get the product by way of the Soviet Trade Counselor in Norway. The boots that enable a traveller to walk at 40 km per hour speed did not come to the market.	Inquiry General	NA
46	Shipment of a container full of office furnitures, copying machines, overheads, cameras, stenciles and two computers to Port Sudan. This was a project done together with the Eritrean community in Stavanger. No reply from the receiver despite repeated requests.	Project General	C
47	A complete study of how photographs could be transmitted direct from the field to the News Agencies abroad using Telephoto linked to the Inmarsat terminals. The idea of the study is to provide News Agencies good quality pictures of what is happening in the field.	Study Communic	NA
48	Supply of five big cartons full of stationary materials to the office of the EPLF Secretary General in the field. Dozens of perms and binders together with file seperators were also send in addition to the cartons. For consignment list see under my projects.	Material General	C
49	Proposal of a systematic and comprehensive filing system for the office of the Secretary General of the EPLF in the field, with the aim of being able to archive important documents and also be able to retrieve them quickly when needed.	Document General	C
50	Supply of important documents on MEETING SKILLS/TECHNICS & PROCEDURES prior to the anticipated meeting with the Ethiopians. Other written materials that was supplied is entitled "PROBLEM SOLVING & DECISION MAKING TECHNIQUE"	Supply Document	C
51	Designed, printed and supplied various standard forms for the EPLF & ERA offices to make their communication and data management system easier. Forms and questioners for the various plant trials in the field accompanied the seeds.	Supply Document	C
52	Designed, printed and supplied a complete MINUTES OF MEETING form with EPLF letter head. The MOM form is presented in a very simplified manner that the writer of the minutes can easily record all that is said in the meeting.	Supply Document	C
53	Designed and supplied telefax front pages for the office of the SG in the field, ERA UK EPHP, EPLF European office in Brussels. Using telefax for transmitting serious messages was a big transformation as it would be more reliable than oral communication.	Document General	C
54	As elected member of the supervising committee I have participated in the planning and execution of the KTET fund raising campaign in 1989. I find it necessary to mention here that the most notorios Eritrean, Sirak Kifle, was elected to the comittee but he never participated in the campagn nor did he pay his own contribution to the campaign.	Campaign General	C
55	A suggestion for a systematic fund raising campaign by Eritreans in Europe and USA to cover the costs of anti-aircraft missiles was made detailing all the elements of the campaign. Project was not approved by the leadership because of its publicity.	Project Military	NA
56	Collection and delivery of various intermediate technology based product data applicable in third world countries. List of Intermidiata technology based projects that succeeded in some countries in the third world.	supply Document	C
57	A collection of geotechnical documents showing possible locations of ground water. The date of the data collection goes back to the Italian and British administrations. Data on the hydrological response of the drainage basins to rainfall events is shown.	supply Document	C
58	Evaluation and comparison of various models of portable generators to supply power to the satellite communication equipments. The neccessity of a portable generator became apparent when the link with the field was to be extended to the day time.	Document Energy	C
59	Technical and price evaluation of solar panels from various suppliers was made. The purpose of the inquiry is the need to supply power to the laboratory in Orotta hospital. good offer was made by a company in Oslo where purchase and shipment followed.	Document Energy	C
60	Collected essential policy and regulations document for about 10 years from the Norwegian Petroleum Directorate for preparing models of oil policy for the new country to come. To my big surprise the authorities did not show interest after independence.	Document Energy	NA
61	Collected many video cassettes on petroleum engineering on geology, geophysics, reservoir, drilling, completion and production from the company I work for, putting in mind that they could be usefull for students and teachers of petroleum linked subjects.	Video Energy	C
62	Documents of three oil policy models used by three oil producing countries to enable the Eritrean authorities evaluate the options available to them. I consider this dossier as very valuable to a new nation with ambitions to explore hydrocarbon in its region.	Document Energy	NA
63	Collection of clippings from various new oil producing countries on the kind of agreement they make with multinational oil companies. Under normal circumstances the availability of such a collection should be valued but that was not the case.	Document Energy	NA
	A comprehensive study and data collection of the market for used Ferry Boats	Document	

64	(passenger + cargo) in connection with the project of constructing deep sea harbour facilities in the liberated shores of Eritrea.	shipping	NC
65	An engineering procedure on how to salvage the partly drawn ships in the vicinity of Massaua port after the liberation of the city was secured. The information included about equipments for underwater welding. For more read under my Faxes to the field.	Document marine	C
66	Participated in a panel debate arranged by the Hinna church on the background and fait of displaced people, giving the Eritrean example. The forum gave me the opportunity to orient the audience on the justness of our cause and the duty of nations to take refugees.	Campaign Info	C
67	Participated in the arrangement of human rights violation debate in the Norwegian Church Aid (NCA) locality in Oslo. A list of concrete cases of grave violations in Eritrea by the Ethiopian occupation army were presented.	Campaign Info	C
68	During Operation Dagsverk in 1984 I contributed a long article on the Problems and Prospects of Agriculture in Eritrea at the request of the Redd Barna, which was the sponsor of the project. You can read it under My articles.	information General	C
69	During the Operation Dagsverk campaign in 1987 I visited five highschools in Stavanger and neighbouring town called Sandnes where I gave speeches orienting the students and the staff on the political, military and draught situation in Eritrea.	information General	C
70	Supply of an expensive portable compact overhead machine with all its accessories for use in the field during conferances and presentations. It was one of the latest models with many functions. It was first borrowed from my employers stock but later donated.	Material General	C
71	Supply of an interesting program on nature by the famous british David Attenborough entitled " The Living Earth. " The whole serie program was copied in six video cassettes. It is a very educational and at the sametime entertaining programme on nature.	Material video	C
72	Supply of documents on scientific analysis of Meeting technics, and three video cassettes on general knowledge competition in the United Kingdom called " Going for Gold ". The program is both educating and entertaining.	Material video	C
73	For many years I have collected packed and sent to the field cartons full of periodicals and journals from the Stavanger Public Library. In january the library disposes all they have collected in the previous year.	Material documents	C
74	Supply of kitchen utensils to the Orotta hospital. With the help of the chief cook at the company I work in, the FIGGIO kitchen equipment factory donated several cartons of kitchen utensils and were sent to Eritrea in a container.	Material Health	C
75	Intervened onbehalf of ERA to get a share of the fund raising campaign by the Norwegian artist Anita Skogen. The campaign started after she returned from a visit to Ethiopia and all the money collected in the fund raising campaign was to go only to Ethiopia.	Campaign Relief	C
76	Together with my friend Martin Hovland we strongly challenged a Norwegian priest who returned from Ethiopia and in a newspaper interview claimed that all was going OK with the relief operations in Ethiopia. At last he admitted that it is unsafe to tell all the truth.	Writing Info	C
77	Helped a Norwegian journalist, the author of the book MOR ERITREA, to communicate with the Secretary General for confirmation of his statments on some issues prior to the printing of the book. She had earlier interviewed him during her visit to the field.	Communic General	C
78	Compilation of varaiety of photographes on Eritrea in an album binder. I captioned them all. The pictures are taken in the 60s by a Swedish missionary. The album has high quality pictures. It was liked by the public and has circulated in many schools and libraries.	Compilation Album	C
79	A comprehensive collection of scientific journals and product data was made from 1982 until 1988. 'It covers biotechnology, solar energy, water pumps, drilling riggs, fertilizers among the many products considered suitable for use in the field.	Document General	C
80	Preparation of a new tigrigna book entitled Questions & answers about our country. Eritrea. It covers history, geography and agriculture. The aim of the book is for Eritreans to test their knowledge with entertainment. Software problems hindered completion.	Information Document	NC
81	Tipped and supplied Tsegai Dinish with newspaper clippings which condemned the EPLF but had positive remarks of the Derg. The journalist apparently had interviewed Dinish in Oslo before he interviewed Derg officials in Addis Abeba.	Supply Information	NR
82	Arrangement of a succesful information meeting in Stavanger with the help of slide pictures by Dr. Frank Bakke after his return to Norway from the field. Yemane Haile and Abraham Woldu attempted to sabotage the program without success.	Campaign Information	C *
83	Arrangement of information meeting to Stavanger city officials using E.A.Aurbakkens slides from Eritrea. ERA Norway led by Yemane Haile hindered the mailing of the slides in good time. It infuriated Erik Aurbakken who intervended to send the post quickly.	Campaign Information	C *

84	Supplied Tsehai Dinsh with copies of standard forms to be used by the EPLF office in Scandinavia and also offered him advices on how to win the hearts of the Scandinavian public and institutions to no avail. He never appreciated my work although I tried to work closely with him. His closest friends were people without vision and opportunists.	Advice General	NA
85	Publication of a two page list of important dates in the Eritrean history. It covers important dates from 1550 up to 1975. The publication date is 1977 when I was in Oslo. It was very helpful during presentations as it was listed in chronological order.	Document Information	C
86	Publication of a CHECK LIST for travellers to the Eritrean field. This was the idea of my close friend and partner in the telecommunication project Dr. Frank Bakke. Copies were distributed. It includes medical information like vaccination, consumables, distances etc	Document Information	C
87	Writing feature articles on Eritrean culture, traditional laws, nature and environment to give the Norwegian public other aspects of the Eritrean heritage outside the war images that they have become all familiar with. Many appreciated to know other aspects of Eritrea.	Media Document	C
88	I believe my article entitled " The Norwegian Connection " has contributed very much for the Norwegian political parties and politicians of all persuasion to support our cause because they felt Norway has a hand in our fate. Read under my articles.	Media Document	C
89	Formatted, printed and published the famous letter of martyr TIKU YIHDEGO that was written in 1971 and sent to the Eritreans in North America. The document was used in political education of the mass organization.	Print/distr Document	C
90	Compilation of clippings from local and international newspapers and journals from different countries right from the start of the campaign by the Derg up to their demise. The military campaign was known as Red Star or the 6th offensive. EPLF came out victorious.	Comp/distr information	C
91	Compilation, duplication and distribution of newspaper/magazine clippings in 1985. It was entitled WAR AND DRAUGHT in ERITREA with a preface critical to the Derg and the donors. There were 2 versions, one in English language and the other in Norwegian.	Comp/distr Information	C
92	Compilation, duplication and distribution of newspaper/magazine clippings in 1987. It was entitled ERITREA IN THE WORLD PRESS. The document contains a supplementary computer listing of references. Here too are English/Norwegian versions.	Comp/distr Information	C
93	On three occasions I wrote letters to NEWSWEEK criticising the editors for boycotting Eritrea and after they started writing to correct their choice of words. Only one was printed. But the editors sent replies. You can read them all under my articles.	Writing Information	C
94	After their comprehensive coverage of Eritrea a letter of applause was sent to the editors of TIME magazine. They replied and expressed their happiness on receiving my letter. You can read them all under my articles.	Writing Information	C
95	One letter correcting their information and an article criticizing the consecutive governments in Israel for standing against the Eritrean struggle were sent to the Jerusalem Post. Both were published. You can read them all under my articles.	Writing Information	C
96	A quick and strong challenge to the newspapers in Norway was made after reports criticizing the EPLF for attacking relief convoys was published. The media were quoting the Ethiopian foreign ministers speech on the attack. There was no EPLF version quoted.	Writing Information	C
97	A unique gheez software programme with all commands in tigrigna was designed and distributed from Stavanger by Michael, a member of RICE Stavanger branch, under a research programme. A database for the Orotta hospital was built in geez and delivered.	Research Software	AP
98	Supply of accounting database for RICE/Europe was made by a member of RICE-Norway Stavanger branch. The name of the program designer is Michael Yohannes and we worked closely. The accounting database may be the first of its type in Geez language.	Supply Software	AP
99	Supply of rare documents on Eritrea published during the British Administration were donated to RICE headoffice in Rome. My supplier of these rare documents is a daughter of one of the pioneer Swedish missionaries in Eritrea.	Supply Rice/Info	C
100	Supply of the original copy of the famous tigrigna book ZANTA 44. The original was too old that I had to copy several times to create a new original. Later it was printed and distributed by RICE/Europe in cooperation with the Holland Development Group.	Supply Rice/Info	AP
101	Supply of various documents, maps and other data to C. Brodersen for his Bachelor thesis. His book is entitled: Eritrea Land and People, and covers a lot of geographical data and focuses on the protection of environment. He is a strong supporter of Eritrea.	Supply Rice/Info	C
102	Designed, prepared and distributed a catalog of names and addresses of EPLF, ERA, RICE, MASS ORG. and all associated organizations. In addition the catalog contains addresses of all important News Agencies. For more read under my publications.	Research Rice/Info	AP
	Under the request of Dr. Nerayo a project to produce 10.000 plastic tags to be distributed	Material	

103	among the fighting liberation army for quick identification of his/her blood group was started. The project was half way but abandoned after a Relief organization volunteered to take the project and cover all its expences.	Health	AB
104	Designed and ordered three wide seals that resembles a half page form for use by the medical personnel in Orotta hospital to register patients data from admission time, during treatment and discharge.	Material Health	C
105	Designed and printed standard forms and pads exclusively for use by the Public Health Departments pharmaceutical service. The forms are designed to help the pharmacists to have good control of the remaining stock after every request/order is excecuted.	Document Health	C
106	Supply of a highly confidential document from the Scandinavian Red Cross Societies outlining their conditions for giving aid to Eritrea. The document was faxed to Newix in the field in good time. He read it a few hours before his meeting with the delegation.	Supply information	CC
107	Supply of confidential document to ERA through Dr. Nerayo. It gives all statistical figures of aid given to Ethiopia from 1980-1986 in cash and in kind. It also tells how much is allocated for the Eritrean region under the administration of the Derg.	Supply information	CC
108	Information tip to the Secretary General who was on his way from London to Oslo. The document describes the points the Norwegian officials and relief agency representatives with which to confront him in the meeting. For the telefax read under my correspondance.	Supply information	CC
109	A complete report on research institutes and funding organizs. in Norway together with a list of Eritrean professionals in Norway was submitted to the chairman of RICE, Arefaine Berhe. He officially expressed his utmost satisfaction at the content of the report. But Mass Org. led by Abraham Woldu was uncomfortable at the achievment and admiration.	Document Rice/Info	C *
110	Supply of NORAD application forms for fund and a tip to RICE the availability of special fund for research purposes in war stroken areas. The situation in Eritrea as a war zone had a good chance of getting fund. RICE-Europe had capabl members to do the research.	Document Rice/Info	C
111	A tip to RICE/Europe of availability of fund for environmental research by the UNDEP, the United Nations Department for Environmental Protection and the Norwegian Peace Research Institute PRIO in Oslo was given.	Information Rice/Info	C
112	Initiated a working relationship between FIVH and the EPLF after making a presentation of the EPLF and its policies, among others, its human treatment of its prisoners of war. FIVH was cool towards Eritrea but was very active in Tigray. Read my correspondance.	Document General	C
113	After preparing a long text of appeal I personally met the leaders of major Trade Unions in Stavanger. Many of them were interested to know more about the Eritrean struggle. One year later I was given the honor of making a speech at the 1st.May rally.Read my speeches	Information General	C
114	After the Socialist Left party of Norway condemned the intervention of Cuba in the Horn of Africa in their annual meeting of 1979 I wrote a long letter appreciating their stand and courage. Copy of the letter was sent to the Mass Org. But Abraham Woldu instead of appreciating preferred to say that I am not authorized to write. Read my correspondances.	Document General	C *
Projects after independence			
115	After independence I worked closely with Paulos Kahsai to study the options of establishing a national airline for our new country. We got valuable information and advice from two professional consultants. For more read documents under my projects.	Project Airline	NA
116	After the idea of a Joint Venture with the Ethiopians in running an airline became the choice, I obtained confidential document from SAS offices on the agreement signed by the three Scandinavian countries to own SAS jointly.	Project Airline	CC
117	An initiative on the study of Development Plan for Mai WUUY was made immediatly after independence. 'The study outlines multi-beneficial aspects of developing the geothermal water sources in MAY WUUY with modern facilities for health and income generating purposes. I was told that initiatives are taken by the Asmara University but seen nothing.	Project study	NA
118	Contact was made with the Norwegian publisher Gyldendal with the aim of exploring the possibility of using the mathematics books for elementary schools in Norway with little modification of unknown symbols in Eritrea and replacing the languae by tigrinja.	project publication	NR
119	Procurement and shipment of Maritime communication system MCS-9120 spareparts direct from Stavanger to Asmara. Keyboards, printers, telefaxes and electronic unit connector cables are among the list of spareparts.	Material Electronic	C
120	Procurement and shipment of a total of five new version Saturn-C satellite communication equipments with many accessories after independence. As required I was applying for license for each terminal that was bought until their decommissioning in 1994.	Project Telecom	C

121	Procurement and shipment of a Saturn-M satellite communication equipment with some extra accessories. This was done after independenc. This was the latest version at that time.The most compact version of all the INMARSAT terminals. For more read my projects.	Project Telecom	C
122	Preparation and distribution of tender documents to potential bidders in Norway and Sweden for the supply of 5.000 telephone sets, wall plagues and sockets. After sending all the bids to Asmara the project to buy these articles was abandoned	Material Telecom	AB
123	Purchase and shipment of the latest and most compact Saturn Mp terminal. Saturn M terminal is so tiny that it is placed in a samsonite hand bag. It is as small as a laptop. The owner can travel with it any where and have the access to the intrnational network.	Project Telecom	C
124	Purchase and shipment of Saturn M Options. This order consist of extension cables, plugs for antenna, soft case for the Saturn Mp already bought, sun shield cover for antenna unit and battery pack 14Ah w/charger 12vdc/22ovac	Optional Telecom	C
125	In 1994 I decommissioned all the terminals in Eritrea from their Norwegian licenses and helped the Eritrean Telecommunication to be members of INMARSAT. Later all the terminals in Eritrea were recommissioned under Eritrean licenses. It was time to say farewell to my 7 years of engagment with INMARSAT and the telecom venture in the field.	Project Communic	C
126	After making evaluation of different products from various vendors a purchase order and shipment arrangement of a specially compact and durable telefax machine was made. It is called RiCho and was compatible with the new compact terminal named Saturn-M.	Project Communic	C

C* = show that there was attempt to sabotage the project.

CC = show that document was confidential at that time.
